

Team Meeting 3/31/2016

Agenda:

Scope Mounting

Extender Piece

Order Parts

Shop Plans

Pendulum Plans

Scope Mounting: Picture on Wikipage. Front impact idea, might have to move the pendulum over a little. Maughan suggested to hit the scope vertical.

Extender Piece: Dillon has designed it. Bigger set screw so it doesn't ruin it.
Plate stays on the same side.

Order Parts: we want to order parts from McMaster and then the steel from facilities.

Shop plans: Wednesday at 8:30 making the scope mounting

Pendulum plans: we want to make a pendulum that doesn't have variable length.
Make a solid pendulum.

Arduino – need to ask Dillon

Parts made, Arduino, calibrated, safety.

Action Item:

Email rob and tell him we are not doing a tech presentation at expo – Kylie
